## RoHS Compliance Statement

EC Directives 2011/65/EU (RoHS 2) and Supplementary Directive 2015/863/EU (RoHS 3) have been implemented to restrict the usage of specific hazardous substances within electrical and electronic equipment. These directives govern the utilization and marketing of hazardous substances in electronic devices and components.

In the field of electrical engineering, certain substances are recognized as environmentally hazardous and should be prohibited from use in products by RoHS directives. The primary objective of RoHS is to minimize the introduction of these substances into the environment. This primarily pertains to the substances outlined in ANNEX II:

Lead (Pb) (0.1%)

Mercury (Hg) (0.1%)

Cadmium (Cd) (0.01%)

Hexavalent chromium (Cr+6) (0.1%)

Polybrominated biphenyls (PBB) (0.1%)

Polybrominated diphenyl ethers (PBDE) (0.1%)

Bis (2-ethylhexyl) phthalate (DEHP) (0.1%)

Butyl benzyl phthalate (BBP) (0.1%)

Dibutyl phthalate (DBP) (0.1%)

Diisobutyl phthalate (DIBP) (0.1%)

(Note: The specified limit value for all substances is a maximum of 0.1% by weight, except for Cadmium, which has a limit value of a maximum of 0.01% by weight.)

Please be aware of the exceptions outlined in the directive that are applicable to the substances mentioned above and their respective quantity limits. We hereby confirm that, to the best of our knowledge, our products fully comply with Directive 2011/65/EU (RoHS 2) and Supplementary Directive 2015/863/EU (RoHS 3).

If you have any further inquiries or require additional information regarding our RoHS compliance, please do not hesitate to contact us.
